

ENVIRONMENTALPOLICY

Commitment to the Environment

Westland Co-operative Dairy Company Ltd (Westland Milk Products) is committed to, improving our local and global environment, managing waste by continually seeking new ideas and putting adequate resources into company wide processes to prevent waste and pollution at source as well as promoting continual improvement.

This will be achieved by

A continual improvement process covering the use of resources, the environmental impacts of our processes, the use of hazardous substances and disposing of hazardous waste.

We will seek to conserve all forms of energy used in our production process and minimise the use of non-renewable resources.

We commit ourselves to developing objectives, targets, performance measures and action plans to promote continual improvement in our environmental performance.

We commit to developing emergency preparedness and response procedures to prevent adverse impacts on the environment.

We will ensure compliance with regulatory requirements as well as the spirit of such regulation and whenever possible exceed these requirements.

We undertake to report annually to our shareholders and the public on our environmental performance.

The company is committed to the philosophy of environmental awareness. Management will ensure staff is aware of their environmental responsibilities through staff training programs.
